

METHOD AND SYSTEM FOR PRESENTING CUSTOMIZED ADVISORY INFORMATION

Abstract of the Invention

5 A network advisory system that provides customized advisory information to a field service
provider is disclosed. The network advisory system receives collected data from one or more
destination facilities and analyzes the information to generate customized advisory information. The
customized advisory information is used by the field service provider to provide a service at the
destination facility. The field service provider may receive the customized advisory information
while in transit to the destination facility or while located at located destination facility. The field
10 service provider receives the customized advisory information through a network connection. The
network connection may be either a wireless connection or a land-based connection.
